EXPERIENCE & NOTABLE CONTRIBUTIONS

Hashed Health · Nashville, TN · 2/2017-Present

LEAD BLOCKCHAIN DEVELOPER

Implemented working applications on Ethereum, Hyperledger Fabric, and Tendermint utilizing a range of different applications. Developed one of the first ERC-721 use cases with the Hashed Health Bramble platform. Developed secure applications for enterprises. Ranked Top Blockchain Development in 2018 Black Book Cybersecurity Survey.

Personal Consulting/Development · Nashville, TN

SOFTWARE DEVELOPER

Worked with a number of different companies providing both coding services, and security audits. Deploy applications, and working closely with founders to effectively have their vision come to life. Companies I've worked with includes ConcourseQ, BlockEra, and local startups.

LKQ Corporation · Nashville, TN · 5/2015-5/2017

SOFTWARE DEVELOPER

Full stack Developer for internal and external use. Created projects that increase productivity. Created applications that connected the different ERP's within the organization to work seamlessly with each other. Led team with upgrading application from scratch to become more efficient which is still used and being built upon.

DEVELOPMENT EXPERIENCE

Software Developer for over 8 years. Experience and comfortable with a number of different languages. Have recently been heavily involved with blockchain development over the 3 years. Developed heavily on cutting edge technologies, which involved quick learning/implementations of a number of different protocols. Utilized Amazon Web Services for both personal and business use cases. Comfortable with front-end development/frameworks, I have used React-Redux, and Angular, and Django.
